PROFESSIONAL SUMMARY

Software Engineer who builds modern web products from concept through deployment using React, Next.js, and TypeScript. Experienced in full-stack development, rapid prototyping, accessible interface design, debugging, regression testing, and user-centered iteration. Brings product thinking, feature ownership, and an enterprise IT and cybersecurity foundation to reliable, production-ready software.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, PHP, SQL/MySQL, HTML5, CSS3

Frontend: React, Next.js, Tailwind CSS, responsive UI, component architecture, state management

Backend & Data: Supabase, PostgreSQL, authentication, REST APIs, asynchronous data flows, JSON

Testing: Functional testing, regression testing, debugging, troubleshooting

Tools & Workflow: Git, GitHub, Vercel, VS Code, Node.js, npm

Systems & Security: Windows, macOS, Active Directory, Azure/Entra, TCP/IP, secure enterprise systems

FEATURED SOFTWARE ENGINEERING PROJECTS

ALLEVIN - Adaptive Productivity Workspace

2025-Present

Technologies: React | Next.js | TypeScript | Tailwind CSS | Local Storage | Git | GitHub | Vercel

- Architected and deployed a responsive, single-page productivity application with reusable components, adaptive workflows, local-first persistence, and predictable state recovery.
- Owned feature development from rapid prototype through debugging and regression testing, refining information architecture, accessibility, and user trust through continuous tester feedback.

FrontOffice - Multi-Sport Social Platform

2026-Present

Technologies: React | Next.js | TypeScript | Tailwind CSS | Supabase | PostgreSQL | Authentication | Git | Vercel

- Engineered and deployed a full-stack social application with authentication, cloud-backed persistence, user profiles, posting workflows, feeds, saved content, and asynchronous database operations.
- Implemented responsive interfaces, reusable component architecture, and state-driven interaction flows while iterating on onboarding, discovery, and content visibility from active testing.

Software Engineering Portfolio

2026

Technologies: React | Next.js | Responsive Design | Git | Vercel

- Developed a responsive portfolio that presents live applications, engineering case studies, product decisions, and implementation outcomes in a cohesive single-page experience.

PROFESSIONAL EXPERIENCE

Southwestern College - Clerical Assistant II / Web & Technical Support

Jul 2025-Present

- Maintain and troubleshoot institutional web content and application workflows using HTML, JavaScript, PHP, MySQL, authentication systems, and accessibility-aware publishing practices.
- Develop Python automation tools for operational tracking and calculations, document technical processes, debug user issues, and collaborate with technical and nontechnical stakeholders to improve reliability and efficiency.

U.S. Air Force - IT Help Desk Technician / Cyber Warfare Operator

Jun 2020-Jun 2024

- Supported secure enterprise systems, endpoint environments, authentication services, networking, and communications infrastructure in operational settings requiring reliability and precise documentation.
- Diagnosed Windows, TCP/IP, VPN, router, switch, and access issues; documented procedures and restored service across mission-critical environments.

EDUCATION & CERTIFICATION

Master of Human-Computer Interaction and Design - University of California, Irvine | Expected 2027

B.A. Computer Information Technology - Point Loma Nazarene University | Minor: Creative Digital Design

Certification: CompTIA Security+
