

ISAIAH BROWN

San Diego, CA | IBrown92105@gmail.com | Active Secret Clearance | [Portfolio](#) | [GitHub](#) | [LinkedIn](#)

PROFESSIONAL SUMMARY

Software, UX, and security-focused technology professional with a B.A. in Computer Information Technology and hands-on experience building deployed web applications, Python automation tools, and AI-assisted user workflows. Experienced with React/Next.js, TypeScript, JavaScript, Python, PHP, MySQL, REST/API integration concepts, testing, debugging, technical documentation, and secure systems support. Portfolio includes a live one-page Next.js project site showcasing ALLEVIN, FrontOffice, and responsive UX-focused frontend development.

TECHNICAL SKILLS

Programming: Python, TypeScript, JavaScript, PHP, SQL/MySQL, PowerShell, HTML5, CSS3

Frontend / UI: React, Next.js, Tailwind CSS, responsive layouts, component-based UI, accessible interface patterns

Software / APIs: AI-assisted workflows, JSON data handling, REST API concepts, modular design, debugging, SDLC fundamentals

Tools / Dev Workflow: VS Code, GitHub, Git, Vercel, Node/npm, browser dev tools, technical documentation, code iteration

QA / Operations: functional testing, regression testing, issue isolation, troubleshooting, validation, monitoring, user acceptance support

Systems / Security: Security+, Windows, macOS, Active Directory, Azure/Entra, Intune, TCP/IP, DHCP/DNS, VPN concepts

SELECTED TECHNICAL PROJECTS

Portfolio Website - Software / UX Project Hub | Independent Software Project | San Diego, CA | 2026 <https://isaiah-portfolio-liart.vercel.app/#home>

- Designed and deployed a one-page responsive portfolio to present live projects, case-study style project details, resume access, GitHub, LinkedIn, and contact links in one streamlined experience.
- Built with Next.js, TypeScript, Tailwind CSS, reusable React components, accessible navigation, responsive project cards, a custom browser tab icon, GitHub version control, and Vercel deployment.

Project ALLEVIN - AI-Assisted Adaptive Workspace | Independent Software / UX Project | San Diego, CA | 2025-Present <https://allevin.vercel.app/>

- Built a portfolio-quality Next.js application that helps users keep projects, materials, writing, schedule, and next steps connected in one calm adaptive interface.
- Developed project creation, document and image materials, a focused Canvas writing area, calendar scheduling, local persistence, regression testing, and Vercel deployment.
- Designed AIDock as an assistant layer that works from active project context to summarize materials, suggest next steps, explain reference support, and help users stay focused.

FrontOffice - Multi-Sport GM Social Hub | Independent Product Concept | San Diego, CA | 2026-Present

- Designing a responsive sports GM/social hub where fans can manage teams, create mock moves, post hot takes, debate in War Rooms, and keep receipts on predictions over time.
- Planned API-ready architecture for live news, stats, standings, injuries, transactions, transfers, roster movement, and performance trends while keeping the UI focused on decision-making.

Python Internal Tools | Southwestern College | National City, CA | 2025-Present

- Built Python tools for budget tracking, procurement, inventory, key issuance, request intake, and sales tax calculations to reduce manual work and improve operational accuracy.

PROFESSIONAL EXPERIENCE

IT Support Specialist / Clerical Assistant | Southwestern College | National City, CA | 2025-Present

- Support faculty and staff with application access, login issues, software configuration, endpoint setup, AV equipment support, and technical troubleshooting across daily campus operations.
- Maintain institutional web pages using OmniCMS, HTML, JavaScript, PHP, and MySQL while troubleshooting page behavior, integration issues, content structure, and accessibility consistency.
- Assist with onboarding/offboarding workflows, account access provisioning, software license tracking, documentation, and system update support across Microsoft 365 and Active Directory environments.
- Collaborate with staff, administrators, and technical teams to translate technical issues into clear action steps, project updates, and user-facing guidance.

IT Help Desk Technician / Cyber Warfare Operator | U.S. Air Force | Active Duty | 2020-2024

- Supported enterprise systems, secure communications, endpoint devices, network connectivity, and cybersecurity operations in domestic and deployed environments.
- Troubleshoot TCP/IP connectivity, authentication services, VPN technologies, routers, switches, wireless access points, endpoint communications, and secure remote access.
- Monitored network performance and security using enterprise monitoring and IDS/IPS platforms, identifying anomalies, investigating suspicious activity, and supporting operational continuity.
- Configured and maintained Windows systems, software deployments, patch management, system hardening, compliance validation, operational procedures, and technical documentation.

EDUCATION

B.A. in Computer Information Technology, Point Loma Nazarene University | San Diego, CA

Minor: Creative Digital Design | GPA: 3.6

Master of Human-Computer Interaction and Design, University of California, Irvine | Incoming Graduate Student, Fall 2026

CERTIFICATIONS

CompTIA Security+ (2025)
