PROFESSIONAL SUMMARY

Software and Product Engineer building user-centered products across web, desktop, AI-assisted, embedded, and physical systems. Works from product concept and UX through implementation, native integration, prototyping, testing, and deployment, with a focus on turning complex systems into clear experiences people can actually use.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, Rust, C++20, Objective-C++, PHP, SQL/MySQL, HTML5, CSS3

Web / Product: React, Next.js, Vite, Tailwind CSS, responsive UI, accessibility, component architecture, PWA

Desktop / 3D / Native: Tauri 2, Three.js, React Three Fiber, OpenCV, Apple Vision, macOS Keychain, local-first file I/O

Embedded / Physical: ESP32-S3, camera hardware, embedded firmware, hardware integration, 3D printing, PETG, rapid prototyping, physical testing

Backend / AI / Data: OpenAI Responses API, REST APIs, Supabase, PostgreSQL, Upstash Redis, authentication, Web Push/VAPID

Build / Cloud / Systems: Git, GitHub, Vercel, Cloudflare Workers, Node.js, npm, Cargo, CMake, macOS, Windows, TCP/IP, Active Directory

FEATURED ENGINEERING PROJECTS

Bench by Kin - Local-First Desktop Engineering Workspace | 2026-Present

Technologies: React | TypeScript | Three.js/R3F | Tauri 2 | Rust | C++20 | OpenCV | Objective-C++ | OpenAI API

- Designed a multi-language desktop workspace for Shape -> Assemble -> Test -> Make with a custom .bench format, 3D assembly, engineering evidence, compatibility checks, native Hand/Puck interaction, secure Rust boundaries, and prototype handoff. Used Bench during Kin Film enclosure development before slicing and fabrication.

Kin Film by Kin - Embedded Digital Camera / Physical Prototype | 2026-Present

Technologies: ESP32-S3 | OV3660 | ST7789 | Embedded Firmware | microSD | Wi-Fi | 3D Printing | PETG

- Built a working digital film-style camera from UX through hardware integration and fabrication: physical shutter, custom interface, limited exposure roll, image capture, phone transfer, custom 3D-printed enclosure, assembly, and physical testing.

ALLEVIN by Kin - Schedule-Aware Personal Life Assistant | 2025-Present

Technologies: Next.js 16 | React | TypeScript | OpenAI API | PWA | Web Push | Upstash Redis | Cloudflare Workers | Vercel

- Built a one-page life assistant with deterministic schedule/date logic, natural-language schedule editing, relative routines, adaptive guidance, and server-side two-phase reminders with atomic Redis claiming and duplicate protection.

Sidewalk by Kin - Editorial City Guide | 2026-Present

Technologies: Next.js | React | TypeScript | Google Places API | Vercel

- Built a city-discovery product that turns live location data into focused neighborhood recommendations and curated day plans with opening-hour logic, caching, session persistence, responsive flows, and accessible UI.

FrontOffice by Kin - Multi-Sport Social Platform | 2026-Present

Technologies: Next.js | React | TypeScript | Supabase | PostgreSQL | Authentication | Vercel

- Engineered a full-stack sports product with authentication, persistent social data, profiles, feeds, receipts, notifications, moderation flows, and responsive multi-user interactions.

PROFESSIONAL EXPERIENCE

Southwestern College - Clerical Assistant II / Web & Technical Support

Jul 2025-Present

- Maintain and troubleshoot institutional web content and application workflows using HTML, JavaScript, PHP, MySQL, authentication systems, and accessibility-aware publishing practices.
- Develop Python automation tools, document technical processes, debug user issues, and collaborate across technical and nontechnical teams to improve operational reliability.

U.S. Air Force - IT Help Desk Technician / Cyber Warfare Operator

Jun 2020-Jun 2024

- Supported secure enterprise systems, endpoints, authentication services, networking, and communications infrastructure in operational environments requiring reliability and precise documentation.
- Diagnosed Windows, TCP/IP, VPN, router, switch, and access issues; documented procedures and restored service across mission-critical environments.

EDUCATION & CERTIFICATION

Master of Human-Computer Interaction and Design - University of California, Irvine | Expected 2027

B.A. Computer Information Technology - Point Loma Nazarene University | Minor: Creative Digital Design

Certification: CompTIA Security+
