PROFESSIONAL SUMMARY

Software Engineer and product builder who designs and ships user-centered software across web, desktop, AI-assisted, and native systems. Builds from concept through deployment using React, Next.js, TypeScript, Tauri/Rust, and 3D/native tooling, with strengths in accessible interface design, local-first architecture, debugging, testing, and translating complex workflows into focused products.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, Rust, C++20, Objective-C++, PHP, SQL/MySQL, HTML5, CSS3

Frontend & 3D: React, Next.js, Vite, Tailwind CSS, Three.js, React Three Fiber, responsive UI, component architecture

Desktop / Native: Tauri 2, OpenCV, Apple Vision, macOS Keychain, native file I/O, local-first application design

Backend / AI / Data: OpenAI Responses API, REST APIs, Supabase, PostgreSQL, Upstash Redis, authentication, Web Push/VAPID

Build / Cloud / Testing: Git, GitHub, Vercel, Cloudflare Workers, Node.js, npm, Cargo, CMake, functional/regression testing

Systems & Security: macOS, Windows, Active Directory, Azure/Entra, TCP/IP, secure enterprise systems

FEATURED ENGINEERING PROJECTS

Bench by Kin - Local-First Desktop Engineering Workspace | 2026-Present

Technologies: React | TypeScript | Three.js / R3F | Tauri 2 | Rust | C++20 | OpenCV | Objective-C++ | OpenAI API

- Designed and built a multi-language desktop workspace for Shape -> Assemble -> Test -> Make, with a custom .bench project format, 3D part transforms, engineering evidence, relationships/constraints, compatibility checks, native Hand/Puck interaction, and prototype fabrication handoff. Rust owns trusted file/API boundaries; Partner credentials remain in macOS Keychain.

ALLEVIN by Kin - Schedule-Aware Personal Life Assistant | 2025-Present

Technologies: Next.js 16 | React | TypeScript | OpenAI API | PWA | Web Push | Upstash Redis | Cloudflare Workers | Vercel

- Built a one-page life assistant with deterministic schedule/date logic, natural-language schedule editing, adaptive recommendations, relative routines, exception handling, and server-side two-phase reminders with atomic Redis claiming and duplicate protection.

Sidewalk by Kin - Editorial City Guide | 2026-Present

Technologies: Next.js | React | TypeScript | Google Places API | Vercel

- Built a city-discovery product that turns real location data into focused, neighborhood-aware recommendations and curated day plans, with opening-hour logic, caching, session persistence, responsive planning flows, and accessibility-focused UI.

FrontOffice by Kin - Multi-Sport Social Platform | 2026-Present

Technologies: Next.js | React | TypeScript | Supabase | PostgreSQL | Authentication | Vercel

- Engineered a full-stack sports product with authentication, cloud persistence, profiles, feeds, reusable components, and state-driven social interactions across multiple sports.

PROFESSIONAL EXPERIENCE

Southwestern College - Clerical Assistant II / Web & Technical Support

Jul 2025-Present

- Maintain and troubleshoot institutional web content and application workflows using HTML, JavaScript, PHP, MySQL, authentication systems, and accessibility-aware publishing practices.
- Develop Python automation tools, document technical processes, debug user issues, and collaborate across technical and nontechnical teams to improve operational reliability.

U.S. Air Force - IT Help Desk Technician / Cyber Warfare Operator

Jun 2020-Jun 2024

- Supported secure enterprise systems, endpoints, authentication services, networking, and communications infrastructure in operational environments requiring reliability and precise documentation.
- Diagnosed Windows, TCP/IP, VPN, router, switch, and access issues; documented procedures and restored service across mission-critical environments.

EDUCATION & CERTIFICATION

Master of Human-Computer Interaction and Design - University of California, Irvine | Expected 2027

B.A. Computer Information Technology - Point Loma Nazarene University | Minor: Creative Digital Design

Certification: CompTIA Security+
